Cnc Notching Machine.	Tick if ok	Fault
Safety Guards in working order?		
Tooling / blades in good order?		
Isolators and cables in good order?		
Feed Chains clean and working?		
All lubrication points greased?		
Pusher and Turn table calibrated?		
Machine clean and tidy?		

Cnc Angled crosscut machine. (Salvador)	Tick if ok	Fault
Safety Guards in working order?		
Tooling / blades in good order?		
Isolators and cables in good order?		
Dust outlet checked for blockages?		
All lubrication points greased?		
Pusher and Turn table calibrated?		
Machine clean and tidy?		

Table saw	Tick if ok	Fault
Safety Guards in working order?		
Tooling / blades in good order?		
Isolators and cables in good order?		
Blade Rise and Fall working?		
Blade Angle turning freely?		
Push stick available?		
Machine clean and tidy?		

Chop Saws	Tick if ok	Fault
Safety Guards in working order?		
Blades in good order?		
Isolators and cables in good order?		
Angle and plumb cut calibrated?		
Motors and Brushes dust free?		
Dust Hood in correct position?		
Machine clean and tidy?		

Band Saw	Tick if ok	Fault
Safety Guards in working order?		
Blade in good order?		
Isolators and cables in good order?		
Machine clean and tidy?		

Two Weekly Maintenance Checks for Wooden Pools Machinery.

Important; Machinery must be locked out before commencing with any Maintenance. Note, If any machine has not been used mark a cross through the table.

Portable Routers	Tick if ok	Fault
Lubricated and in working order?		
Chip deflectors in good order?		
Isolators and cables in good order?		
Machine clean and tidy?		

Bobbin Sander	Tick if ok	Fault
Bobbin secure?		
Isolators and cables in good order?		
Machine clean and tidy?		

Thicknesser	Tick if ok	Fault
Blades clean and sharp?		
Isolators and cables in good order?		
Measuring gauge calibrated?		
Safety Guards in working order?		
Bed clean and lubricated?		
Machine clean and tidy?
