EXTREME CERAMIC LOOK LINER

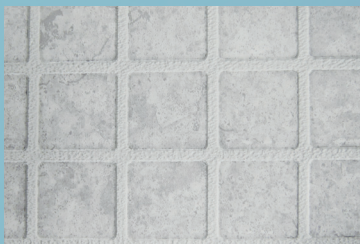

Installed by
**OUR OWN IN-HOUSE
TRAINED FITTERS**

The Ceramic range of reinforced pool linings has the look and appearance of traditional Ceramic tiles. In order to achieve the stunning effect the material is thicker than the traditional range of Extreme® materials. The Ceramic range patterns have been created to give a 3D effect to look like tiles but with all the advantages of a traditional reinforced liner.

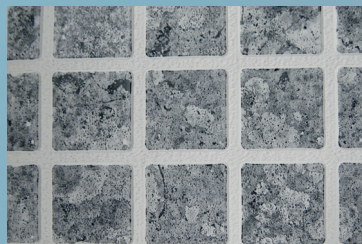

- Guaranteed watertight
- Quick and easy installation compared to glass mosaic tiling
- No fallen tiles or crumbling grout
- Minimum maintenance
- 2mm thick
- Ideal for new pools and for renovations!
- Looks like traditional tiles
- Guaranteed for 10 years
- Slip Resistance Class C

Reinforced & textured for a unique swimming experience

An addition to the Extreme[®] range of lining is the 3D range of patterns. Manufactured in 2mm thick reinforced material incorporating a natural looking textured surface that makes it feel totally unique.

The 3D patterns are designed to give you a completely different swimming experience and give the effect of swimming in a natural environment. As you would expect from an Extreme lining the material has multiple

layers of protective lacquer to keep the liner looking as good as new from day one, whilst resisting the ageing and challenging conditions of a swimming pool.

The Extreme 3D range is available in five distinctive patterns, 3D White Marble, 3D Slate, 3D Sandstone, 3D Rustic and 3D Granite are all manufactured and designed to make swimming in your pool a pleasure for years to come.

POOL LINING SYSTEM

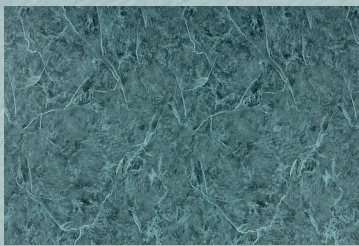

The Alive Collection is the new range of RENOLIT ALKORPLAN. Slightly textured it comes in three colourways, Prana, Dhyana and Chandra. Its thickness of 2 mm makes it a very resistant and robust membrane. In addition, the main features of this new range are the embossed structure and optimum anti-slip resistance class C. Its thickness of 2 mm makes it a very resistant and robust membrane. In addition, the main features of this new range are the embossed structure and optimum anti-slip resistance class C.
