

# POLYWEAVE HEAT RETENTION GeoBubble™ COVER

The tear resistant reinforced pool cover

- **Heat retention**

The vast majority of heat loss from swimming pool water is through evaporation. This will be dramatically reduced when using a Polyweave cover.

- **UV Stabilised**

Specially formulated to protect against breaking down due to harshness of the sun's rays.

- **Reinforced 400 micron material**

This is co-extruded into a tear resistant polythene UV stabilised top sheet.

- **GeoBubble Technology**

The unique shape has been proven to withstand both chemical and UV attack. A smooth shape and uniform thickness results in an increased expected lifespan of 25% compared with conventional covers.

# **Plastica** **POLYWEAVE COVER**

Plastica's Polyweave heat retention cover is available as conventional 12mm bubble or with GeoBubble technology.

The material can be supplied hemmed or as a rectangle to be trimmed on-site.

Cover supplied with a 3 year pro-rata warranty.

Helps to reduce chemical demand as algae cannot thrive without UV rays.

Suitable for indoor or outdoor use, on domestic and light commercial pools.

GeoBubble™ is a trademark of Plastipack Limited

# **Plastica**

**The UK's Leading Independent Swimming Pool Manufacturer and Distributor**
