

SLIDELOCK REEL SYSTEM

The fast and simple way to cover your pool

- **UK manufactured**

Widely regarded as the best domestic reel available. Manufactured from polished stainless steel and anodised aluminium. The Slidelock will give you years of trouble-free operation.

- **Simple to use**

Supplied with high quality bearings and two steering wheels fitted with crank handles. The Slidelock has been designed to enable you to cover your pool quickly and with minimum effort.

- **Motorised and Solar upgrades**

Motorise your Slidelock by adding either a Powerpack in-tube motor or the solar powered Helios system. Both designed to take the hard work out of operating your cover.

- **Reduction Gearbox**

Also available from Plastica is the 3:1 Reduction Gearbox. The drastically reduces the force necessary to operate your Slidelock reel. Ask your dealer for more information.

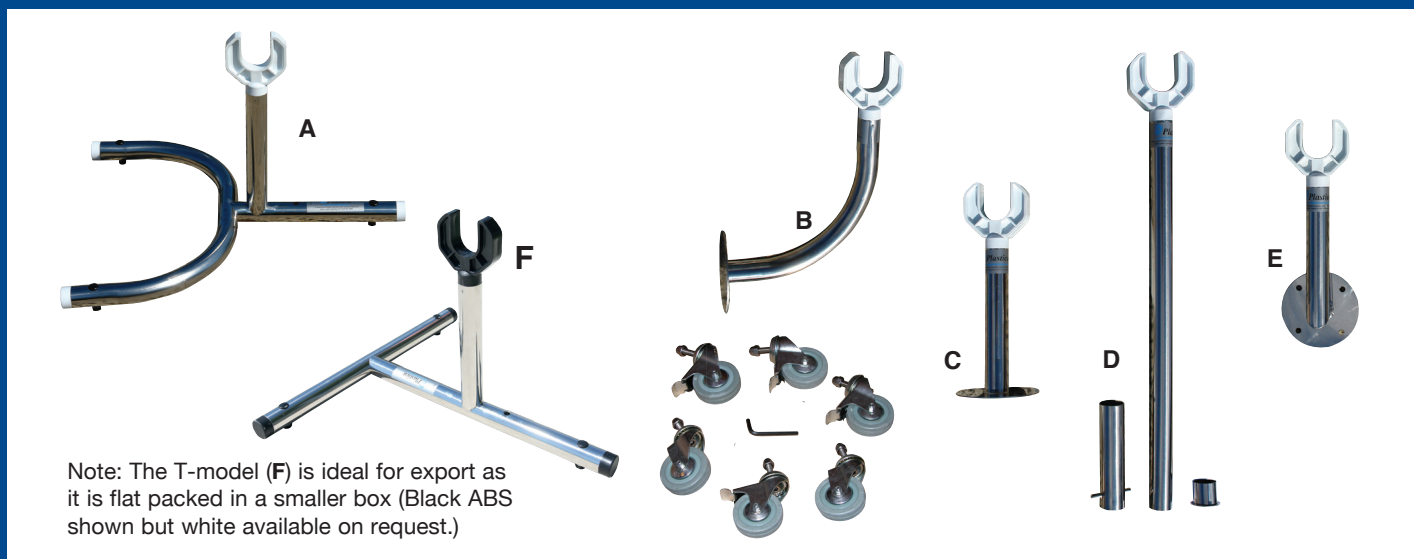

SLIDELOCK REEL SYSTEM

Considered the best domestic reel on the market. Manufactured by Plastica using an anodised aluminium tube, bright polished stainless steel end stands and smooth plastic bearings. The steering wheels are fitted with stainless steel axled crank handles, which helps ensure the system is extremely easy to operate. A unique locking device holds the tube in position, stopping the cover from unwinding.

The Slidelock Telescopic Reel System is extremely versatile and can be easily adapted to be electrically operated with an optional remote controlled Powerpack or alternatively the Helios solar powered system. Please ask for separate literature.

The reel comes complete with all the necessary straps and fittings as well as an instruction guide to ensure a quick and effortless installation of either a new or existing cover to its adjustable reel. There are many optional extras available including a Castor Pack for mobile systems, DIY Leading Edges and Storage Covers.

The Slidelock system is available in two sizes: the small tube which extends from 3.05m to 4.57m (10' to 15') pool width and the larger version which extends from 4.88m to 6.4m (16' to 21') pool width.

A range of five different end stands to choose from:

A. Standard End Stands are free standing and sit directly on your pool surround

B. Wall Mounted End Stands fix directly to the face of an existing wall

C. Base Plate Mounted End Stands bolt directly into your pool surround

D. Sleeve Mounted End Stands slide into a sleeve drilled into your pool surround

E. Side Wall Mounted End Stands fix directly to the face of a side wall

F. T-model ideal for export as it is flat packed in a smaller box.

Option A is also available with the option of six Castor Wheels so that you can easily move the reel system. Alternatively a pair of Deck Anchors can be specified to secure the End Stands to the ground, ensuring the reel system remains secured in place when rolling and unrolling your cover.
