

Winter Debris Cover

Put your pool to bed

- **Helps keep your pool free from debris**

The debris cover makes an excellent barrier against leaves and other debris whilst allowing rain through and preventing dirty water build-up.

- **Choice of fixings**

Choose from a range of fixings including Deluxe, Flush Fix and Premium to suit the surrounds of your pool.

- **Reduces risk of damage**

The debris cover reduces the risk of frost damage by trapping a layer of still air to insulate the pool. It will also reduce decolourisation caused by leaves and other debris.

- **Shaped for your pool**

Your debris cover can be shaped to suit your pool. Standard and freeform shapes are all made to order. Roman ends on the short edge are **FREE OF CHARGE**

“....I purchased a Plastica Winter Debris Cover...it has served us well for no less than thirteen years – and it is still going strong!

It survived almost intact from being attacked by a car...”

Winter Debris Cover

The design and quality of the Plastica Winter Debris Cover is the result of over four decades of Plastica's experience in manufacturing covers.

The Winter Debris Cover is tailored for your pool, making it an excellent barrier against leaves and debris whilst allowing rain water through – therefore preventing dirty water build up on top of the cover. The cover is easy to fit, abrasion resistant and, being manufactured from the best quality material available, is proven to be both reliable and effective. It is available with a choice of tension fittings and anchors and can also be supplied as a **Criss Cross** model, reinforced with straps across the entire cover.

The Plastica Winter Debris Covers are manufactured with a 300mm overlap around the pool, providing a taut, wind resistant barrier against leaves and other debris.

The perimeter is finished with green/black or grey webbing - depending on your colour choice - which is triple stitched to the cover material with rot-proof thread, giving excellent strength characteristics that will last year after year. Straps are added around the perimeter approximately every 0.9 to 1.5 metres for anchoring to the deck, these are protected underneath by tough anti-chaffing straps that resist abrasion from the pool coping stones.

Removing and re-fitting the Winter Debris Cover is a simple do it yourself task.
