POOL DETAILS

LENGTH WIDTH Measured wall to wall
 If diagonals are different, or a freeform pool, a drawing will be required. Please use overleaf.

POOL CORNERS

- SQUARE
 RADIUS SIZE
 MITRE SIZE Measured across the corner angle

COPING DETAILS

If cover is to be used on a reel it is recommended that it should be undersized on the width to allow for any coping overhang.

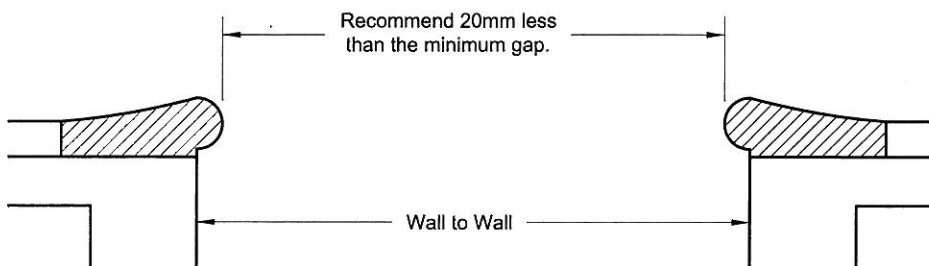

We recomend the cover is 20mm narrower than minimum gap

GIVEN THE ABOVE ADVICE WHAT SIZE COVER/S DO YOU REQUIRE ?

OBSTRUCTIONS

Has the pool got a perimeter handrail or ladders
 If answer is YES please provide details or a drawing overleaf.

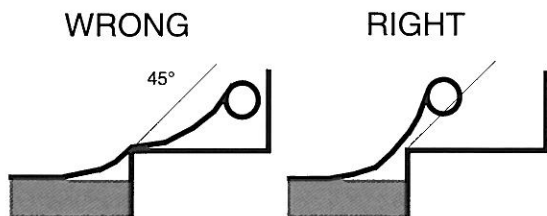

YES NO

We would always recommend a leading edge is used on covers being operated with a reel system.
 Don't forget to order this item.

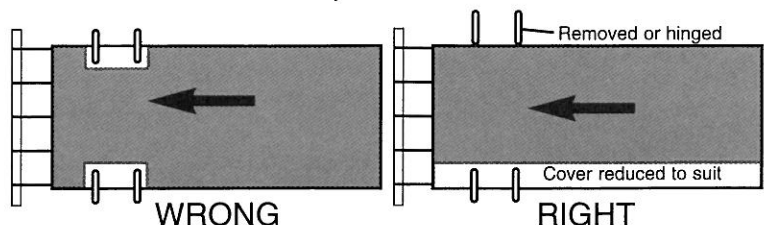

Covers over 12m x 6m should also have re-inforced reel end to avoid cover damage.

PLEASE NOTE :

Do not position reels so that the cover rubs on the coping or deck

Cover cut outs are not compatible with electric reels

All obstructions including ladders and handrails should be made removable or the cover made so as to run inside these obstructions.
